KIT Device

Why choose the KIT device?

Within our time in the lone worker industry, we have consistently heard the same requests from lone workers – the demand for a smaller, more flexible device, which is easy to use. We carefully considered customer requirements when developing the KIT lone worker device and are pleased to say that it delivers all of the below-market demands:

Easy to use

The KIT lone worker device features an easy to locate SOS button. The size and position of the button, allows the user to discreetly trigger an activation when needed.

Versatile

The KIT lone worker device is supplied with an accessory pack featuring a belt clip, lanyard and an exclusively designed ID badge. It is easily switched between accessories.

The perfect size

Weighing just 35g, the KIT lone worker device is light and fits more than comfortably into the palm of your hand. The small size makes the KIT discreet and easy to use.

Device features

Red Alert

Activated by simply holding down the “SOS” button for a few seconds. The button is easy to find and activate.

Amber Alert

Users are able to leave a detailed message relating to their task which can start a timed event.

Man Down

An alert will be sent to our operators if sudden movement, followed by a period of inactivity is detected.

GPS

By using the very latest Ublox 7 chipset, a high degree of location accuracy of up to 10 meters.

Two-way audio

Allows our operators to talk to and reassure the user (if safe to do so) when an alert has been activated.

Locate me

Record your current position by pressing a dedicated button. The device will also send regular GPS positioning.

Vibrate

The device will vibrate to indicate when a Red Alert is initiated, and again once connected to an operator.

Battery life

Rechargeable battery with up to 30 hours of use. Full battery recharge is achieved in approx. 2.5 hours.

LED

Coloured LED's show the user at a glance what the KIT Device is doing, including GPS, signal and battery status.

Roaming SIM card

This will pick up the strongest network signal in a given area across all major networks, both inside and outside of buildings.

ID Badge

Why choose the ID Badge?

The First2HelpYou ID Badge is BS8484:2016 approved and incorporates the latest GPS, GPRS and Man Down technologies. Featuring Amber Alert with a timer as well as the Red Alert function, this is the perfect, easy to use solution for any lone worker.

Easy to use

The ID Badge features an easy to locate SOS button. The size and position of the button allows the user to discreetly trigger an activation.

Versatile

The ID Badge is supplied with an accessory pack featuring a belt clip and lanyard, allowing the lone worker to easily switch between accessories.

The perfect size

Weighing just 80g, the ID Badge is lightweight and easy to use. The ID format of the device lets users feel protected, whilst remaining discreet.

Device features

Red Alert

Activated by simply holding down the "SOS" button for a few seconds. The button is easy to find and activate.

Amber Alert

Users are able to leave a detailed message relating to their task which can start a timed event.

Man Down

An alert will be sent to our operators if sudden movement, followed by a period of inactivity is detected.

GPS

The device uses the very latest GPS chipset, which provides a high degree of location accuracy of up to 10 meters.

Two-way audio

Allows our operators to talk to and reassure the user (if safe to do so) when an alert has been activated.

Locate me

Record your current position by pressing a dedicated button. The device will also send regular GPS positioning.

Vibrate

The device will vibrate to indicate when a Red Alert is initiated, and again once connected to an operator.

Battery life

Rechargeable battery with up to 30 hours of use. Full battery recharge is achieved in approx. 2.5 hours.

LED

Coloured LED's show the user at a glance what the ID Badge is doing, including GPS, signal and battery status.

Roaming SIM card

This will pick up the strongest network signal in a given area across all major networks, both inside and outside of buildings.

Lone worker app

For iOS and Android

The lone worker app can be installed on Android and iOS smartphones. Both applications provide a solution without having to carry around an extra gadget.

We have worked with dedicated software designers to create our own perfect application. You won't find this anywhere else.

Not only is it easy to use, but it is also a cost-effective solution. No one should be at risk because of budget constraints.

What's more, if installed on an Android phone, the lone worker app is fully compliant with BS8484: 2016, the industry standard for lone worker safety products.

Device features

Red Alert

Activated simply within the app or via the override function key (override feature on Android only).

Amber Alert

Users are able to leave a detailed message relating to their task which can start a timed event.

Man Down (Android only)

An alert will be sent to our operators if sudden movement, followed by a period of inactivity is detected.

GPS

The phone utilises the latest GPS chipset, which provides a high degree of location accuracy of up to 10 meters.

Two-way audio

Allows our operators to talk to and reassure the user (if safe to do so) when an alert has been activated.

Bluetooth button

Android applications can be paired via the Bluetooth button, allowing you to discreetly activate an alert.

Vibrate

A discreet vibration lets the user know that a red alert has been activated and is connecting with the ARC operator.

Standard mobile phone

Low cost, easy to use

The simple to use mobile or landline solution lets users record details of their lone working task along with an end time. The solution is compatible with any mobile or landline (as long as caller ID is presented).

This solution would suit employees who do not face high levels of risk in their everyday working tasks.

Whilst the simplicity of this product is one of its key features, it is not BS8484:2016 compliant.

Device features

Red Alert

Activate by holding down the dedicated key (typically number 5). This triggers a call to our alarm receiving centre.

Amber Alert

Using a dedicated key (typically number 2), users can leave a message regarding their task and location.

Two-way audio

Allows our operators to talk to and reassure the user (if safe to do so) when an alert has been activated.

Connect portal

Easily monitor where your lone workers have activated their devices

First2HelpYou have created their own client management portal, Connect, which gives you full visibility of your estate of lone worker devices/solutions. The portal is easily accessible, and you will be given a login when your lone worker safety solution is rolled out.

With Connect, you can easily monitor where your lone workers have activated their devices to help keep them safe, respond quickly to any activations, and audit the take-up of your lone worker solutions.

Please note that we do not sell this product on its own. Clients will be given a login when a lone worker safety solution is rolled out.

Device features

 <p>Real-time reports</p> <p>View which of your employees have used their device and whether they have set an alert.</p>	 <p>GPS location</p> <p>Locate your employees on a map and where they've been during a certain time frame.</p>	 <p>Activations</p> <p>The ability to view historic activations of all Amber Alerts, Red Alerts and Man Down alerts.</p>
 <p>Admin</p> <p>Quickly and easily add and/or remove users and escalation contacts using the portal.</p>	 <p>Lone worker status</p> <p>View the status of each device, such as offline, in Amber Alert, or in an alarm state.</p>	 <p>Amber Alert audio</p> <p>If needed, our Amber Alert playback function lets you listen to the voice message left.</p>

First2HelpYou are a premium supplier of BS8484: 2016 accredited lone worker safety devices and solutions.
